## Regenesis Management Group Announces Key Management Additions, Water Resource and Irrigation Systems Competencies

DENVER--([BUSINESS WIRE](#))--Regenesis Management Group, LLC, a company that focuses on the efficient use of finite natural resources through the development of innovative techniques, software and instrumentation, announced today that Stephen W. Smith, former CEO of Aqua Engineering, Inc., of Fort Collins to has joined its management team. Mr. Smith founded Aqua Engineering 35 years ago with a handful of employees and grew it to an internationally renowned irrigation engineering firm.

"I am extremely excited to consider Mr. Smith a part of our team. His expertise, experience and entrepreneurial drive are welcomed," said Kevin France, Head of Strategic Development at Regenesis Management Group. "Mr. Smith's dedication and technical expertise will provide a significant leap forward as we focus our research and development efforts," said Ed Warner, faculty affiliate in the Department of Geosciences at Colorado State University and Joint Venture Liaison at Regenesis Management Group.

---

**"We strive to incorporate strong science and research applications into its work, and Mr. Smith will significantly compliment this strategy."**

---

"Joining the management team has been gratifying and exciting for me. Our current technology development efforts jive beautifully with all of my water resource efforts and experience of the past decade. It's a wonderful time to be pulled into this flow – pun intended!" said Stephen Smith.

Mr. Smith has been involved in activities related to water rights, efficient irrigation system design, and remote data acquisition on a regional and national basis. Mr. Smith taught irrigation design for 19 years at Colorado State University and is currently completing a doctorate in civil engineering at CSU. He recently completed a term as president of the Irrigation Association, a national trade association.

"I am looking forward to working with Mr. Smith in scientific and technical applications," said Robert Stollar, Head of Science and Research for Regenesis Management Group. "We strive to incorporate strong science and research applications into its work, and Mr. Smith will significantly compliment this strategy."

Regenesis Management Group is developing a combination of processes, instrumentation and technology which provide a system to sustain irrigated agriculture while meeting the increasing urban water needs in Colorado, in addition to other western states and beyond. Known as SWIIM™, or Sustainable Water and Innovative Irrigation Management™, when utilized in correct order and in proper quantities, this comprehensive approach acts as a conserving technology, with the monitoring and verification of water use.

Mr. Smith will direct engineering and technical efforts for Regenesis Management Group, including managing the company's research and development arrangements, including those with Colorado State University and the United States Department of Agriculture. Additionally, he will direct the company's private consultants and software development personnel in water resource engineering, irrigation development and other related technical applications.

### About Regenesis Management Group, LLC

**Headquartered in Denver, Colorado, Regenesis Management Group is a management company that develops systems, instrumentation and related technologies designed to conserve and better utilize natural resources, including water, land and energy. Regenesis Management Group believes that capitalism and resource conservation are not mutually exclusive – both goals can be accomplished in a profitable manner, through implementation of breakthrough technologies and by fostering profitable, beneficial systems to better utilize natural resources with conservation in mind. This results in a positive impact on all stakeholders, including business, property owners,**

community and the environment. For more information about the company, visit our web site at <http://www.regenmg.com> or contact us by telephone at (303) 777-4000.
